Court upholds Morton Grove's handgun ownership ban

Morton Grove's controversial handgun ban cleared yet another hurdle Wednesday as the Illinois Court of Appeals unanimously ruled that banning the private

ownership of handguns does not violate the Illinois Constitution. "A municipality has broad discretion to determine not only what the interest of the public

welfare requires but what measures are necessary to secure those interests," wrote the judges. Additionally, the court com-

mented, "We find that the means adopted, a ban on handguns, constitutes a reasonable manner of promoting that interest." The three-judge panel heard

arguments on the case on January 6 and reached a decision on the case much quicker than usual, according to legal sources. Continued on Page 27

Project closing as of 1984-85 school year

District 63 votes to close Melzer school

by Eileen Hirschfeld

Erma S. Melzer school, 9400 N. Oriole, Morton Grove, is scheduled to close its doors to students in East Maine School District 63 as of the 1984-85 school year, according to board action at a regular meeting Feb. 8. Because of declining enrollment, Melzer is attended by about 215 students. Optimum educational benefits cannot be

gained with so few children enrolled at each grade level. In five years, enrollment at Melzer could dwindle to 170 students, according to District projections of student attendance. According to the same projections, Washington school, 2710 Golf, Glenview, would be faced with the same difficulties as Continued on Page 27

From the Left Hand

by Bud Besser

The battle of the closing of schools continues in 1983. It is likely to continue well into the '80's.

The focus of school closings returns this week to School District 63. Since this column is written before Tuesday night's East Maine school board meeting, we can't anticipate the board's action pertaining to which school will eventually be shuttered.

The Melzer School, with a population of about 220 students, is at the center of the storm. Parents from nearby Nelson School will be at the meeting telling board members not to bus their children to Melzer. We're sure Melzer parents will try to counter the Nelson School parents' arguments.

While most parents have a parochial interest in keeping their nearby neighborhood school open, the board members have the more difficult job of seeking what is in the best interests of the entire school district.

Nelson school's population is around 550 students. Melzer is around 220 enrollment including many special education students who live throughout the district. Meanwhile, across from Golf Road, and a few blocks west of Melzer, Washington School's population is about 260.

Maine Township High School District 207 has a long tradition of providing quality educational programs for students of all ability levels. People move to the district because they are looking for a good education for their children. And the performance of Maine students on college placement examinations and the achievements of Maine graduates attest to the continuing success of District 207 in offering students a firm educational foundation upon which to build their future.

"Taxpayers have always been willing to pay for quality education," said Dr. Michael Myers, Assistant Superintendent for Instruction in District 207. But in these times of declining enrollment coupled with inflation, taxpayers want to know what they are paying for. They want more than just the idea that education in District 207 is excellent. They want proof.

"Since taxpayers are demanding more accountability and ob-

jectivity, we want to provide it for them," said Dr. Myers. "And to do it, we are building a performance based instructional system that will provide more data about what students are actually learning." District 207 is going to spell out concrete goals and objectives, and then test students to see if those goals and objectives are being met.

According to Dr. Myers, the creation of the comprehensive testing program does not suggest that students in District 207 are no longer receiving the same fine instruction that has been traditional. The object of the testing program is to provide more detailed information about that instruction. But that information will not be used just to satisfy taxpayers. It will also help teachers and administrators to make educational decisions that will make this quality district even better. Performance based testing can help make better students, better teachers, and a

Niles guard honored

A Village of Niles school crossing guard, Michael Ustic, was recently honored at a Village Board meeting for his years of service to the community. Mr. Ustic was a crossing guard at the corner of Milwaukee and Touhy avenues for the past seventeen years and during that time never missed a days work in assisting the school children across the busy intersection. Mr. Ustic started as a school crossing guard on Oct. 1, 1965 at the age of 19 years and retired at the age of 70 years and retired at the age of 87. During part of these years Mr. Ustic also worked as a swimming pool crossing guard near Mulford and Milwaukee during the summer months.

In presenting the retirement plaque to Mr. Ustic, Niles Mayor Nicholas Blase stated, "Mr. Ustic is a true example of dedication to a job, despite many days of inclement weather Mr. Ustic worked outside every school day to help our children cross the streets. For this we are grateful and, on behalf of our community, and especially all of the children he has helped cross the street, we say 'thank you'."

LETTERS to EDITOR

His Honor finds Hanson "witty" and The Bugle "stuffy"

Dear Editor:
I have been an ardent admirer of Mr. Ed Hanson for many years. I consider his columns to be colorful, erudite and informative. In a "stuffy" paper such as yours, it is indeed a pleasant relief to read Mr. Hanson's witty remarks. I think the idea of providing straight news without breaking it up occasionally with something a little different makes for

generally boring reading. For that reason I welcome Mr. Hanson's column and frankly have missed reading it recently. Keep up the good work, Ed. Success is often measured by the number of people who are willing to be critical of your work. Very truly yours, Nicholas E. Blase Mayor, Village of Niles

LWV reps interview state pols

The League of Women Voters of Morton Grove-Niles interviewed State Senator Robery Egan (7th District) and State Representative Ralph Capparelli (13th District) as part of an Illinois LWV project. Co-presidents Ruth Hibnick and Marilyn Kramer as well as Judy Barys and Carol Panek spent a most interesting and enlightening Saturday morning in January.

In addition to getting acquainted with the representatives the local leagues were asked to specifically discuss fiscal policy in light of the League's recent state study and to ask questions regarding taxes and funding. The Illinois League will compile the answers, which should help the LWV better understand this next General Assembly.

Both men were very much aware of the League's activities and were glad to have the opportunity to exchange opinions on taxes and other subjects. The League hopes to renew such contacts at a later date. Call Eileen Hirschfeld, (966-7187) for more information about the League of Women Voters or about the Illinois Legislature.

Lenten programs at St. John Brebeuf

St. John Brebeuf Parish in Niles will address the subject "Dreams: Images of Meaning". Sister Dorothy believes that dreams come to warm, advise, correct, comfort, and heal us. She has studied Jungian approaches to remembering and interpreting dreams. The premise of this evening is that dreams belong to all of us and that learning about dreams prepares us to learn from them. On March 22 Thomas Kilroy, a psychotherapist in private practice, will present "Interpersonal Peacemaking Skills". Conflicts in living are inevitable. The skill needed is not one of avoiding these problems but in finding creative ways of resolving them. Simply enduring conflicts, nonproductive fighting, moodiness, or helplessness seldom help and often build up destructive residues of anger. Kilroy will present a model for conflict resolution which promotes and sustains relationships and family structures.

BIBLE SHARING is a weekly gathering of those who wish to study, share, and pray together. TODAY THIS HOUSE IS JUST SMART. TOMORROW IT'LL BE BRILLIANT.

Nobody has to tell you what's happening to the cost of energy today. It's all up, up, up.

So if you're looking for a new house, it makes a whole lot of sense to look for one with an Energy Smart sign out front. One that uses energy like a miser. That keeps the cost down, down, down.

That means a house with double-glazed windows.

With ceilings insulated to a minimum rating of R-19.

With walls insulated to at least R-11. With exterior openings carefully weather-stripped and caulked.

And with an Electric Heat Pump instead of a central air conditioner and furnace. That's the key. The Heat Pump.

All summer long it works just like central air conditioning. But in the winter it reverses itself. It takes heat from the air outside and pumps it inside to keep you warm.

What's more, the Heat Pump does that so efficiently it provides at least 50 percent more energy (heat) than the energy (electricity) it uses.

And that's very, very smart when you consider that the cost of natural gas has gone up 52 percent faster than electricity since 1967, and oil has gone up 113 percent faster.

Better yet, it'll be downright brilliant when natural gas gets deregulated or OPEC bumps up the price of oil a few more times.

The Energy Smart house. It can make tomorrow a lot easier to live with.

Cablenet construction on the increase in Park Ridge

Park Ridge has been the target of increased Cablenet construction activity as the activation date of that community draws near. Park Ridge residents with aerial utilities will be the first to be contacted for service because the inclement winter weather has brought underground construction to a halt.

Underground construction will resume, weather permitting, with the spring thaw in April. Residents of areas scheduled for underground construction will first be contacted by Cablenet Right-of-Entry personnel seeking to obtain permission from each homeowner to use the rear or side yard easements. Cable net has permission to use the front yard parkway by virtue of its agreement with the city, but would prefer not to exercise this option.

Walter Weckers, Cablenet President, explains: "We prefer to work in backyard easements but if two adjacent property owners refuse to give permission to use their yards, we must place our cable in the front rights-of-way, sometimes for an entire block. This process involves the installation of our pedestals in front of homes, and some homeowners feel that this does not look proper."

After laying the cable, Cablenet will restore the property as close as possible to the original condition. All cuts will be tamped down and loosed dirt and grass will be swept up. After a few days there will be no indication of any underground construction having taken place there.

The methods that Cablenet uses to lay cable in the easements are designed to minimize damage to property and landscaping. If for some reason a resident is not satisfied with the work done, he may contact Cablenet and a representative will be sent out to resolve the problem.

Maine East gymnasts down south

Although the Maine East Demons beat the Maine South Hawks by only 2 points, the victory is still a big one for the greatly improved East Girls' Gymnastics team. It gives the Demons a chance to still be in contention for second place in the CSL S. Division, as Maine South, Maine West, and East are all tied for 3rd behind Evanston and New Trier. Coach Betty Axelson has predicted all along that her team had the potential, but it would take a long time and a lot of effort before they looked like a polished team. "Our girls looked pretty clean Friday night against Maine South and we were pleased to keep the tradition going of never losing to South, but we'll have to be even tougher and more competitive to score well in the conference meet. We have to improve in Vaulting and Uneven Bars in Friday's meet if we want to stay ahead of the other teams,

The vivid details of color camouflaging and growth patterns creates an exceptional picture of life on the ocean bottom.

Local realtor awarded highest designation

Vincent A. Scarpelli, Vice-President and General Manager of Century 21 Welter/Investment Equities, Inc. was awarded the coveted Certified Commercial Investment Designation (CCIM) on January 27, in Miami Beach, Florida. The designation is awarded by the Realtors National Marketing Institute of the National Association of Realtors. A CCIM is defined as an individual who, by experience, education and knowledge of the marketplace, is an expert in Commercial/Investment Real Estate. Each CCIM is a licensed Real Estate professional who has completed a rigorous course of study and fulfilled experience requirements to earn the designation.

This announcement was made by Ken Welter, President of the firm, who was awarded the CCIM designation in 1980. There are currently only 80 CCIM's in Illinois and only 1,700 in the entire nation. "We are all very proud of Vince's achievement and know his clients are truly the lucky ones who will benefit from his vast knowledge in Commercial/Investment, as well as

Edison fuel cost credit

For the fifth month in a row, Commonweath Edison customers will see a fuel adjustment credit on their February bill. This credit, which reflects fuel cost reductions, will bring the cumulative savings that a typical residential customer using 500 kilowatt-hours will realize to \$3.88 in Chicago and \$3.72 outside Chicago.

According to Edison officials, the credits help reflect the reduced fuel costs made possible by Edison's continuing commitment to low-cost nuclear fuel. Coal, which is the company's next most economical fuel, is four to five times as expensive as nuclear fuel, and oil is about 10 times as expensive.

Kustra assigned to Senate Education Committee

State Senator Bob Kustra (R-28th) has announced that Anita Kimmerle will be the office manager of his district office in the Des Plaines Civic Center. Mrs. Kimmerle was formerly a congressional aide to Congressman John Porter and manager of his Evanston office.

Commenting on his new Senate assignment, Kustra said, "I can't think of a more effective way of serving the people of the 28th District than representing them on this Committee. For too long, suburban schools have been shortchanged when state aid has been distributed. The school aid formula must be rewritten so those of us in the suburbs get our fair share. I want to make sure that the income and sales tax dollars my constituents pay are returned in proper proportion for their children's education."

The Illinois General Assembly is expected to take action on state mandates this year which local school districts claim are costly

and not entirely reimbursed by the state. Kustra predicted that some changes would be made in these laws. "I do not believe in abolishing mandates such as special education, driver's education, and physical education. However, it is possible to rewrite some of these laws giving local school districts more flexibility and allowing local school districts to change fees for certain programs heretofore considered free."

Kustra, who was elected to the State Senate last November, was sworn in on January 12. He may be reached regarding education issues or other matters at his Des Plaines office at 299-5646.

Former Porter Aide joins Kustra staff

State Senator Bob Kustra (R-28th) has announced that Anita Kimmerle will be the office manager of his district office in the Des Plaines Civic Center. Mrs. Kimmerle was formerly a congressional aide to Congressman John Porter and manager of his Evanston office.

Commenting on his new Senate assignment, Kustra said, "I can't think of a more effective way of serving the people of the 28th District than representing them on this Committee. Capparelli appointed House Majority Whip

State Rep. Ralph C. Capparelli (D-13th) was appointed Majority Democratic Whip by House Speaker Michael J. Madigan for the 83rd Illinois General Assembly. This is the first time that a member of the Illinois legislature was appointed to this high leadership position from the far northwest side.

As a member of the Democratic leadership team, Capparelli will help set policy for the Democratic membership of the House and will serve as an ex-officio member of all House committees. Capparelli termed the appointment "a distinct honor and one to which I look forward."

Capparelli is currently in his seventh term and for the past several years, has served as Chairman and later Democratic Spokesman of the powerful House Executive Committee. He has authored, introduced and co-sponsored numerous pieces of legislation. Perhaps one of his most significant proposals was the one that required all eating establishments in the state to post the life-saving instructions for persons choking on food particles. This act alone has saved countless lives.

Although a member of the Democratic leadership, Capparelli said he will continue, as in the past, to seek ways to improve the communities which he represents.

In addition to juggling the students between these schools, East Maine has an overcrowding situation at the Stevenson School at the very west end of the area. Board members have to balance all these problems while also balancing their budget.

The local parents want their "walk to" schools left open. We heard the cry when they closed Ballard School. And it was repeated when Wilson school was shuttered. And the hue and cry was heard when Oak School was closed. We're sure Tuesday night the same lament will be heard again.

Even though we're on the sidelines, we feel like an old warrior in hearing these battles repeated again and again. We were at the campaign of shouts and war cries when Niles East High School was closed. We viewed the center of the storm when a one vote margin closed Maine North rather than Maine East high school. And we were there when they closed Jefferson school in School District 64 and Golf elementary school in District 67.

Concerned parents should realize the pattern for closings begins to form years before "their" school is closed. Talk of the likelihood Melzer would be closed began 3 or 4 years ago. It was then parents should have tried to find a way if they desired their local school remain open.

We periodically write about the next closing of one of the Maine high schools. The same parents whose elementary schools have closed in District 63 may see their

"local" Maine East High school closed. One more Maine high school will be closed and you can be sure Maine South in Park Ridge will not be the closed school. The battle will be between Maine East and Maine West in Des Plaines.

If you are paying attention TODAY, you'll watch closely the way the Maine high school board is aligned. When the final vote is taken on the closing of one of the schools, the board members in either Park Ridge or Des Plaines will have the greater number seated. East Maine, which has always gotten short shrift on the high school board, will not likely have the votes to keep open their local school.

Residents interested in keeping Maine South and Maine West open understand this TODAY and will be sure they have enough voting power when the issue comes to the fore to protect their schools. Maine East's present residents will once again lack the necessary voting power.

It is an unfair comparison to equate the closing of elementary schools with the closing of the high schools. At the grade school level it seems the sole measure of closing is based on what is in the best interests of the entire school district. In the case of closing the high schools, strong aligned political pressure takes over. Nevertheless, the parents who are shouting today at the elementary level should have been fighting the good fight years ago.

If they are concerned today, they should have been attending school board meetings yesterday. They didn't yesterday and today "their" schools are being closed.

Morton Grove Womens Club donates to Charities

On February 10, at their monthly meeting, members of the Morton Grove Womens Club will vote to disperse over \$3,000 to charities and worthy causes. The funds were raised at their annual Philanthropy Luncheon and Fashion Show held last October.

Morton Grove Historical Society

On Sunday afternoon, February 13, between 1 p.m. and 4 p.m., the Morton Grove Historical Society will have an open house on the lower level of the Morton Grove Village Hall. The Historical Society rooms can be reached by a direct entrance from the south parking lot of the Municipal Building Complex at 6101 Capulina ave.

The salt and pepper shaker collection of Betty Oclon, a Morton Grove resident, will be on display, as will a collection of old-fashioned valentines that belong to Jayne Barry, a moving force behind the establishment of the rooms, and also a Morton Grove resident. The public is invited to visit without charge.

Gun ruling...

Continued from Page 1

The Illinois suit was brought by Morton Grove residents Michael Kaladimos, George L. Reichert, Robert Metler and Richard Schnell. They were represented in court by the law firm Pedersen and Houpt which also represents the National Rifle Association. Schnell is a candidate for Morton Grove village trustee in the upcoming April election.

The Illinois Court of Appeals decision follows the December 6 ruling by the three-judge U. S. Court of Appeals upholding the Morton Grove handgun ban.

Voting two to one to uphold the ordinance the federal court issued the first definitive decision ruling on the ordinance. In its written statement the court said it was not unconstitutional for a village or city to outlaw the private ownership of handguns.

Just as Morton Grove officials expect gun control foes will appeal the December decision to the U.S. Supreme Court so an appeal to the Illinois Supreme Court is now expected.

The Morton Grove handgun ban was adopted by the Morton Grove Village Board in June, 1981. Since that time individuals and groups on both sides of the gun control issue have used the Morton Grove ordinance as a rallying point.

Additionally, the nationally recognized Jenner and Block law firm, located in Chicago, has assisted Morton Grove attorney Martin Ashman in opposing the court challenges to the ordinance.

District 207...

Continued from Page 3

Better students are those who are challenged at their own ability level. A test score can help teachers and counselors place a student in a course that meets his needs whether those needs are remedial, advanced, accelerated or advanced placement. Comprehensive testing can also help a teacher pinpoint those areas where an individual student is lacking. Then it can help determine the remedial action that is necessary to improve his performance.

Testing provides a concrete way to inform students and parents of each student's achievement level. It can also compare that achievement level to other students in the district showing his performance in relation to his peers. Comprehensive testing can show a student his progress over his high school career. It can even help him make plans for after high school by showing the student his strengths and weaknesses.

Good teachers can become better teachers because the testing can provide information for planning in-service and staff development programs in the areas where test results show they are needed. Are students learning what teachers are teaching? A test score can help determine the answer to that question.

FREEZE dance...

A good district keeps its eye on the competition. Comprehensive testing can compare the achievement of groups of District 207 students to the achievement of groups of students across the nation. And finally, when it comes time for curriculum review and long range planning, comprehensive testing scores can help make the job easier.

District 63...

Numerous options presented by District administration, board members and persons from the community called for shuffling of students from one school to another or gerrymandering of school district boundaries.

In attempting to solve the dilemma, board members came full circle from an original eight options which included closing Melzer.

A motion to close the school was made by Richard Smith, board member and approved in a 4-2 vote. In favor of the motion were Norman Padnos, Joan Futerman, Richard Smith, and Larry Solomon. Those against were Al Hanhart and Ann Sostrin.

Board members, in the not too distant past, closed four elementary and one junior high school mainly because of declining enrollment and dwindling state revenue based largely on student attendance.

As part of his motion, Smith asked administration to develop a comprehensive plan dealing with transportation and housing of Melzer students to another school next year. Smith also asked that structural and educational plans be made for Melzer students during the 1983-84 school year.

About 150 persons attended the meeting, with a total of about 200 persons having attended former meetings on redistricting. After much research by administration as well as board and community input, board members reluctantly seemed to conclude the closing of Melzer would disturb the least amount of students and be most acceptable to the community. At a former meeting, a representative of the Melzer P.T.A. had said the school should be provided with more students or closed. Board members commended the interest of Melzer parents on the quality of education for their children.

Uppermost in the minds of board members, administration and parents seemed to be transportation, safety factors, mainstreaming of special education children, contiguous boundaries and keeping communities intact.

Burger King...

Continued from Page 1

Specifically, information about the reward will be distributed in Chicago neighborhoods where police officials believe the killers may live.

John Anthony Terry, 34, a manager of Burger King, 7133 Dempster St., was shot and killed during the robbery attempt. Witnesses said Terry began to run for his office, possibly to telephone police, when he saw two robbers entering the back door of the fast food restaurant. The robbers shot Terry when he began to run.

Witnesses described the robbers as Spanish speaking men in their early twenties learning to believe they may be members of a Chicago gang.

Police officials said publicity about the reward would be distributed to Spanish newspapers and radio stations as well as television.

Witnesses have reviewed suspect photos provided by the Chicago Police Department in an attempt to locate the robbers.

The reward money, according to Giovannelli consists of \$5,000 put up by the Village of Niles, \$2,500 from the owners of the Niles Burger King and \$2,500 from Chart House, Inc. which owns Burger King.

as well as student numbers. In other action, Dr. Donald Bond, District superintendent, advised board members that Parkside Services, Inc. a branch of Lutheran General Hospital, expressed interest in buying Nathanson school now rented by Parkside as a geriatric facility. Board members did not give approval for sale of the school at Parkside's offer or for a larger sum. Parkside's offer was slightly below the school's appraised value.

Also, board members approved adoption of a calendar for the 1983-84 school year beginning with a teacher's Institute Day August 29 and ending with student dismissal June 22, 1984. Attempts have been made to synchronize, as much as possible, the school year (including holidays) with the high school District 207.

Also, board members approved distribution of the Corporate Personal Property Replacement tax for 1983 with the first \$6,630 paid toward the Illinois Municipal Retirement tax and the remaining percentages paid: 79% to the Educational Fund; 16% to Operations, Buildings and Maintenance Fund; and 5% towards the Transportation Fund.
